Product Maintenance Recommendations Vinyl Plank Ranges

1. Sweep or vacuum your floor regularly (at least once a week) to remove loose dirt and dust.
2. Prevent stains by wiping up spills immediately.
3. Regular damp mopping using a PH neutral detergent or a regular vinyl cleaner.
4. It is not recommended to use wax on Vinyl planks as this can cause a slip hazard.
5. The use of floor protector pads under the legs of furniture is highly recommended.
6. Avoid exposure to direct sunlight for prolonged periods. During peak sunlight hours use blinds or drapes to minimize direct sunlight.

Please Note:

The product surface is protected by a factory PU (poly-urethane) coating. Oil stains can be removed using alcohol or a PH neutral detergent. The use of other substances, such as vinegar (which is a weak acid) may, even in a diluted application, risk permanent damage to the product. Substances that are not "PH NEUTRAL" should not be used to clean the floor.
